

IP7142 Fixed Network Camera

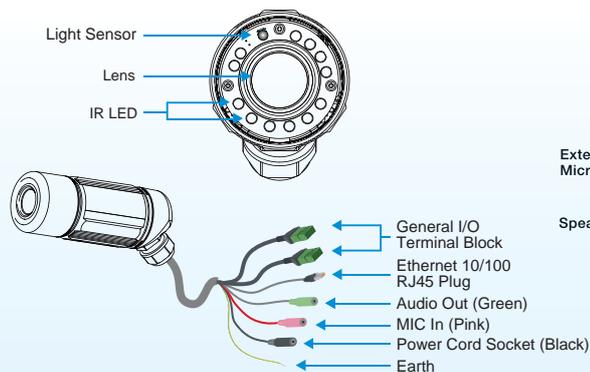

WDR · Outdoor · Day & Night

VIVOTEK IP7142 network camera features a WDR (Wide Dynamic Range) CMOS sensor to cope with any challenging lighting conditions. The WDR feature captures both of the dark part and bright part and combining the differences into a scene to generate a highly realistic image as original scene. Therefore, IP7142 can provide video quality closer to the capabilities of the human eye. This function enables IP7142 to be largely applied in highly contrast environments such as lobby entrances, parking lots, ATM, loading areas and much more. The day and night function and the IP66-rated integrated housing of IP7142 enable users to easily build up a cost-effective IP surveillance system without additional accessories. Incorporating an IR-cut filter that can be removed automatically at night and built-in IR illuminators with coverage for up to 15 meters, IP7142 is an outstanding 24-hour surveillance solution. Meanwhile, the IP66-rated integrated housing shields this camera from dust and water, allowing it to be applied in harsh weather conditions of outdoor environments. Other advanced features of IP7142 include simultaneous dual streams, 3GPP mobile surveillance, 802.3af compliant PoE, two-way audio by SIP protocol, RS-485 interface for scanners or pan/tilts driver connection, and HTTPS encrypted data transmission.
