

Cable Entries and Protection

Signs & Symbols

The following signs and symbols will help you navigate our catalogue and understand the detailed product information.

Type	WISKA Type
WISKA-No.	WISKA Order-No.
WISKA-No. RAL 3000 RD	WISKA Order-No. flame red
WISKA-No. RAL 7001 SG	WISKA Order-No. silver grey
WISKA-No. RAL 7031 BG	WISKA Order-No. blue grey
WISKA-No. RAL 7035 LG	WISKA Order-No. light grey
WISKA-No. RAL 9001 WH	WISKA Order-No. cream white
WISKA-No. RAL 9005 BK	WISKA Order-No. black
	Packing unit
	Connection thread size
	Connection thread size, outer thread
	Connection thread size, inner thread
	Length Gland-in thread
TL (mm)	Total length
	Cable diameter
	Outer cable diameter below shield

	Inner cable diameter below shield
n 	Quantity of cables
	Key width
	Key width 1
	Key width 2
l/h	Air flow (liter per hour, 70mbar)
	Cable gland
NW	Nominal width
B (mm)	Width
ED (mm)	External diameter
VD (mm)	Maximal diameter
	Drilling diameter
	Wall thickness
	Fastening bore hole
E (mm)	Collar diameter
	Bending radius

OUR HERITAGE. YOUR BENEFIT.

Founded 1919 in Hamburg, we as manufacturer of ship installation materials know the harsh climate on the coast and the challenges to man and material. These extreme conditions have shaped the demands on our products for nearly 100 years. The result is that everything we manufacture is made for the toughest environments.

These markets trust our cable entries:

Automation

Power Generation

Shipbuilding

Lighting

Railway

Machine and Plant Engineering

Electrical Industry

Plug and Connector Technology

Electrical Installation

Distribution

Strong Manufacturing. Strong Products. In Every Category.

With the introduction of our own cable protection range and cable entry system we are now your comprehensive manufacturer of quality products whenever you want to enter a cable. Whether cable glands that can breathe, soft

grommets that can withstand the toughest stresses and strains, or cable protection that defies the most extreme temperatures. When it comes to your cables, our products truly deliver, also under the toughest conditions.

Cable Glands

As versatile as their applications.

Grommets

A fast and easy alternative to cable glands.

Cable Entry System

Brings together.
Keeps together.

Cable Protection

Cable protection for the toughest conditions.

Quality comes from good Partnership

At WISKA we understand the importance of providing our customers and partners the best solutions for their requirements, thanks to our vast, high quality range of products. Our innovation and engineering department is always searching for customised and user-friendly solutions and works hand in hand with our production department. High quality materials and ease of operation for our customers are our main goal in this process.

With our own on site production and the attached state-of-the-art laboratory we can ensure that our products answer our high claims.

We understand ourselves as partners on an equal footing with our customers. With our dedicated consulting and sales team as well as with our worldwide net of representatives and agents we are always there for you to consult on the best solution for your requirements.

Our understanding of excellent partnership is based on knowing one another inside and out. It is about creating mutual trust, which you will appreciate when everything is going smoothly – and even more when a problem arises.

We look at it like this – doing great numbers together is important. And being able to rely on each other is even more important.

Tanja und Ronald Hoppmann, General Managment in third generation

Quality certified

Polyamide cable glands

As early as the 1920s we developed the first plastic cable glands. Today we produce highly specialised polyamide components in-house at our company's steadily growing injection moulding facility near Hamburg.

Metallic cable glands

Brass, stainless steel or zinc – our metallic cable glands are used wherever tough conditions prevail. In shipbuilding and offshore, machine and plant engineering, automation and hygienic design. Different designs, thread types, sealing concepts and protection classes add up to an extensive range, ensuring we have the solution for your application.

SPRINT cable glands, EMSKV, metric, EN 62444

Maritime cable glands

If you are looking for cable glands adapted for the use in the maritime industry on- or offshore we recommend our brass cable glands complying with DIN 89280 and DIN 89285. These are optimised for use in the extreme conditions both on ships and in offshore installations.

EMC cable glands

Modern technologies are constantly becoming more demanding and complex. This increases the vulnerability of electronic components to electromagnetic disturbances. To protect against such interactions, we offer you two different approaches to EMC cable glands which ensure effective 360° shielding and durable impermeability for individual uses with IP68 / 69.

SPRINT EMC cable glands with contact spring insert, EMSKV EMV-S, brass nickel-plated, metric, EN 62444

EMSKV EMV-S

Protection class IP68 (5 bar 30 min) / IP69
Temperature range -40 °C - 100 °C
Material Gland Brass nickel-plated, Clamping cage Polyamide, Gasket EPDM, Contact spring insert Stainless steel 1.4310

EX cable glands

For hazardous areas on oil platforms, in dangerous goods warehouses or in chemical industries we offer EX cable glands with various types of protection complying with ATEX or IECEx. Whether you need a flameproof enclosure, increased safety or intrinsic safety, our EX range includes everything from cable glands to stop ends, enlargements and adaptors.

SPRINT EX cable glands, ESKE/1-e, for increased safety, polyamide, metric

Railway cable glands

Optimised for the requirements of the railway industry we offer our specialised railway cable glands. They comply with the highest quality and safety requirements according to the European fire standard EN 45545 and achieve the highest Hazard Level 3. On top of that, you can use our cable glands made of polyamide, brass and stainless steel modularly with its accessories.

Made for rails

Our Railway series is an industry-specific extension of the proven SPRINT cable gland system, which meets the specific demands of the rail industry in all respects.

Since June 2013, products and materials that are used in rail transport have to be tested in accordance with the unified European fire safety standard EN 45545. After several years of research and development, we have launched an innovative product line that meets with all required quality and safety standards and achieves Hazard Level 3.

We are also one of the first European manufacturers to have successfully tested a complete gland series in brass, polyamide and stainless steel in accordance with EN 45545. Our Railway cable glands are thus the ideal combination of the highest product quality and multiple modularity that still meet all standards. They can be used by manufacturers, suppliers, and rail technology companies in all types of vehicles – whether new or refurbished.

The most innovative use of materials

Within the extensive material testing, we have tested the flammability of industrial and raw materials in accordance with EN 45545-2. For the requirement sets R22 (indoor use) and R23 (outdoor use), the parameters of the combustible materials (plastic, sealing material) we checked:

Requirement sets	Parameters	Unit	Requirement	HL1	HL2	HL3
R22	Oxygen index	Vol.-%	minimum	28	28	32
	Smoke density	D _s max.	maximum	600	300	150
	Toxicity	CIT _{NLP}	maximum	1,2	0,9	0,75
R23	Oxygen index	Vol.-%	minimum	28	28	32
	Smoke density	D _s max.	maximum	---	600	300
	Toxicity	CIT _{NLP}	maximum	---	1,8	1,5

Venting

For reducing outages of electrical installations due to condensation, we offer our range of venting products for optimal pressure equalisation. Our cable glands and pressure equalisation units ensure with their high-performance ePTFE membrane a constant and efficient air exchange between the interior and the exterior. In addition, it is resistant against UV, salt water, greases and oils.

British Standard cable glands

With our cable glands complying with British Standard (BS) 6121, we offer products for installations performed in Great Britain and other countries of the Commonwealth. Due to the use of steel wire armoured cables, these locations require the use of special versions of cable glands.

Sealings

Our comprehensive range of reduction, multiple and special sealing inserts can be combined with all cable glands and materials from the SPRINT cable gland system, meeting at least the IP66 standard. In addition to individual versions, WISKA also offers various materials for special uses, i.e. low temperatures.

Grommets

When cables have to be inserted as simply and quickly as possible, grommets come into play. They have a space-saving shape and are available in many different versions for various cable types. WISKA produces IP66 and IP67 grommets in our twinshot injection moulding facilities in Kaltenkirchen.

CONMAXX cable entry system

With CONMAXX we have developed a cable entry system especially designed for switchboard installations. The innovative 3-component modular system offers you a whole new dimension of flexibility. That way you can perform even subsequent and individual changes to the wiring without any laborious opening and closing of the frame.

CONMAXX – One system – endless possibilities

With CONMAXX we have developed a cable entry system especially designed for switchboard installations and the installation of prefabricated cables. The CONMAXX system consists of a closed frame, variable grid inserts and conical sealing elements. The system is complemented by the CONMAXX Gland our divided retrofit gland.

As easy as it gets – the installation of CONMAXX

Outside the cabinet:

- ① Installation of frame onto the cabinet housing

Inside the cabinet:

- ② Insert cables into the sealings
- ③ Place grid into the frame
- ④ Push sealing elements with cables into the grid

CONMAXX system: Your combination possibilities with our cable entry system

CONMAXX Gland: Your combination possibilities with our divided retrofit gland

Brace cable protection

With the Brace system we add cable protection to our product range. The polyamide BraceFITTING with integrated sealing is a result of our own development and production and fulfils the highest standards. A comprehensive range of fittings, conduits, sleeves and accessories of polyamide and metal completes our cable protection system.
