

GSM LT-1

GSM COMMUNICATION MODULE

Efficient messaging is essential for a modern security system. SATEL provides a complete range of devices intended for reliable transmission of alarm messages through variety of available media: PSTN telephone lines, ISDN networks, GSM or TCP/IP Ethernet networks.

FEATURES

- simulation of analog telephone line over GSM network
- PAGER (DTMF) messaging conversion to SMS
- SMS reception for central monitoring station
- external modem functionality for **INTEGRA** panels
- RS-232 port for module programming and modem functionality

TECHNICAL SPECIFICATION

Supply voltage	12 V DC $\pm 15\%$
Average current consumption in the GSM telephone standby mode	100 mA
Average current consumption in the GSM telephone active mode	250 mA
Required minimum output current, power supply unit	500 mA
Current-carrying capacity, FLT output	50 mA
Weight	216 g
