### NGJKMF 56

#### Switch box, 3-phase continuous, 3x1-pole switch function, 3x3-pole light groups.

With the NGJKMF 56 switch box, a continuous 3-phase supply is branched into three 1-phase (L1,L2and L3) switched outputs and three outputs for 1-pole switch.

The distribution box can be fixed e.g. to the installation plate by screws, max.  $\varnothing$  6 mm, two holes in the middle (distance between holes 75 mm) or four holes in the corners of the box. The boxes can also be fixed with two cable ties from the clamps on the box base or by using the so-called snap-on pins, for which there are four fixing holes on the box base.

Type	NGJKMF 56 Switch box
Description	3 phase -o- , 3x3-pole,3x1-pole switch outputs
Voltage	U=400VAC
Current	I= 20A max -o-
IP Class	IP20
Ean Code	6418677708244
Sstl No.	
E No.	
Weight/Pcs	290g.
Pack Qty	10
Approvals	FI
